
The Broad Institute's artist-in-residence program stimulates collaborative problem solving with an interdisciplinary approach. Together, artists and Broad scientists explore issues of visual representation, and the communication of ideas toward a greater understanding of the complexities of the genomic landscape.

Guhapriya Ranganathan

A Presentation Thursday, December 15, 4 pm

The Broad Institute

7 Cambridge Center, Cambridge, MA 02142

Artist-in-residence **Guhapriya Ranganathan** presents a short video, paintings, prints and a wire sculpture created during her two-year collaboration with scientists at the Broad Institute. Joining in her talk about the intersection between art and science is fellow collaborator and Broad researcher **Erez Lieberman Aiden**.
