Guhapriya Ranganathan

ARTIST-IN-RESIDENCE

KEYWORDS: [WHO IS BROAD \(/KEYWORDS/WHO-BROAD-1\)](#)

Guhapriya Ranganathan

Her paintings carry evocative titles like "Accretions," "Hypertrophic Displacements," and "Effervescence." Organic forms swirl in vivid colors, almost like a vision that might be found on a microscope slide.

Guhapriya Ranganathan – known as Gupi – recently joined the Broad as artist-in-residence, where she combines a love of art, biology, science, and technology. Her educational background is diverse, yet all of her experience seems to feed her artwork. She is a graduate of the Regional Engineering College in Trichy, India, and holds an MBA from the Indian Institute of Management in Calcutta. Closer to home, she holds a bachelor's degree from Simmons College in Boston and

an MFA from the Massachusetts College of Art & Design. Before becoming artist-in-residence at the Broad, she held a Julia Myerson Trustman Fellowship at Simmons, where she recently mounted a vibrant installation at the Trustman Gallery.

At the Broad, it's the interactions with the scientists and researchers that provide inspiration for her artworks. Her most treasured ability: the ability to dream.

For a closer look at her work, check out her website:
